## EXAMINER'S AMENDMENT

### *Election/Restrictions*

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

1. Embodiments wherein the radical scavenger is of Formula i.
2. Embodiments wherein the radical scavenger is of Formula ii.
3. Embodiments wherein the radical scavenger is of Formula iii.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

1. Claims 10-29.
2. Claims 10-29.

3. Claims 10-29.

The following claim(s) are generic: None.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Pursuant to PCT Rule 13.2 and PCT Administrative Instructions, Annex B, Part 1(f)(1)(B)(2), the species are not art recognized equivalents.

During a telephone conversation with James McBride on May 20, 2004, a provisional election was made with traverse to prosecute the invention of Group I, claims corresponding to Formula i. Affirmation of this election must be made by applicant in replying to this Office action. No claims are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/22/04 has been entered.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James McBride on May 26, 2004.

The application has been amended as follows:

**The Claims:**

In claim 1, line 19, delete "thereof;" and insert insert – thereof. --.

In claim 1, line 20, delete the text beginning with "(ii..." through the text ending with "...thereof." In line 46.

In claim 19, line 3, delete the text beginning with "polystyrene..." through the text ending with "...phenol;" in line 6.

In claim 25, line 5, delete the text beginning with "polystyrene..." through the text ending with "...phenol;" in line 9.

In claim 28, line 5, delete the text beginning with "polystyrene..." through the text ending with "...phenol;" in line 9.

**The Abstract:**

As the last page of the specification, insert the following Abstract:

**Abstract of the Disclosure**

The present invention relates to cleaning compositions which comprise radical scavengers, for effective cleaning and improved storage stability. These compositions are suitable for use in various laundry applications including hand and machine laundry methods.

### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Note that, Applicant's amendments, Applicant's arguments, and the Examiner's Amendment are sufficient to place the instant claims in condition for allowance. Note that, Applicant agreed to cancel the non-elected species of radical scavengers which are Formula ii and Formula iii.

Of the references of record, the most pertinent is Ambuter et al (US 6,083,422). Ambuter et al teach thickened aqueous bleach compositions containing either an alkali metal hypohalite or peroxygen bleach. Compositions containing hypohalite or peroxygen bleaches are particularly difficult to thicken with sufficient stability for commercial value. See Abstract. However, Ambuter et al do not teach the specific radical scavenger as recited by the instant claims.

None of the references of record, alone or in combination, teach or suggest a liquid cleaning composition containing an oxidizing agent, a radical scavenger, and the other requisite components of the composition in the specific proportions as recited by the instant claims. Accordingly, since the prior art fails to teach or suggest such a composition as recited by the instant claims, the instant claims are deemed allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
